MZT: top GO terms per contrast group

Top 8 significant BP terms (p < 0.05)

early_vs_unfert | down

- structural constituent of ribosome
- respiratory chain complex I
- purine ribonucleoside monophosphate m...
- peptide biosynthetic process
- inner mitochondrial membrane protein ...
- cytoplasmic translation
- ATP metabolic process
- amide biosynthetic process

early_vs_unfert | up

- protein binding
- positive regulation of gene expression
- nucleus
- nucleoplasm
- nuclear speck
- multi−organism reproductive process
- heterocyclic compound binding
- cytosol

late_vs_early | down

- nucleobase−containing small molecule ...
- mitochondrial matrix
- ribose phosphate metabolic process
- glutathione metabolic process
- response to oxidative stress
- glucose homeostasis
- cytosol
- NAD+ biosynthetic process

late_vs_early | up

- translational initiation
- SRP−dependent cotranslational protein...
- positive regulation of transcription ...
- nuclear−transcribed mRNA catabolic pr...
- negative regulation of gene expression
- cytosolic small ribosomal subunit
- cytosolic large ribosomal subunit
- cytoplasmic translation

late_vs_unfert | down

- structural constituent of ribosome
- purine ribonucleoside monophosphate m...
- phosphorylation
- peptide biosynthetic process
- mitochondrial inner membrane
- inner mitochondrial membrane protein ...
- ATP metabolic process
- amide biosynthetic process

late_vs_unfert | up

- positive regulation of transcription ...
- positive regulation of gene expression
- nuclear speck
- negative regulation of transcription ...
- negative regulation of gene expression
- heterocyclic compound binding
- chemotaxis
- cellular anatomical entity morphogenesis

unfert_vs_fert | down

- snRNA transcription by RNA polymerase...
- positive regulation of transcription ...
- histone locus body
- negative regulation of intrinsic apop...
- positive regulation of gene expression
- generation of neurons

unfert_vs_fert | up

- translational initiation
- structural constituent of ribosome
- SRP−dependent cotranslational protein...
- protein localization to endoplasmic r...
- peptide biosynthetic process
- inner mitochondrial membrane protein ...
- cytoplasmic translation
- amide biosynthetic process
