Top GO terms per tissue − high expressed genes

Top 8 significant BP terms per tissue (p < 0.05)

Abdomen

translational initiation
SRP−dependent cotranslational pr...
purine ribonucleoside monophosph...
protein localization to endoplas...
phosphorylation
nuclear−transcribed mRNA catabol...
cytoplasmic translation
ATP metabolic process

Accessory Gland

translational initiation
SRP−dependent cotranslational pr...
purine ribonucleoside monophosph...
protein localization to endoplas...
phosphorylation
peptide biosynthetic process
cytoplasmic translation
amide biosynthetic process

Distal Ovary

translational initiation
SRP−dependent cotranslational pr...
protein localization to endoplas...
peptide biosynthetic process
nuclear−transcribed mRNA catabol...
multi−organism reproductive process
cytoplasmic translation
amide biosynthetic process

Egg

protein export from nucleus
ribonucleoprotein complex locali...
mRNA splicing, via spliceosome
phosphatidylinositol−3−phosphate...
multi−organism reproductive process
peptide transport
mRNA export from nucleus
protein−containing complex local...

Proximal Ovary

translational initiation
SRP−dependent cotranslational pr...
protein localization to endoplas...
peptide biosynthetic process
nuclear−transcribed mRNA catabol...
multi−organism reproductive process
cytoplasmic translation
amide biosynthetic process

Testes

translational initiation
SRP−dependent cotranslational pr...
protein localization to endoplas...
proteasome−mediated ubiquitin−de...
peptide transport
nuclear−transcribed mRNA catabol...
multi−organism reproductive process
cytoplasmic translation
