MZT: top GO terms per contrast group

Top 8 significant BP terms (p < 0.05)

contrast_2 | down

- gluconolactonase activity
- negative regulation of flagellated sp...
- negative regulation of calcium−depend...
- negative regulation of DNA catabolic ...
- meiotic sister chromatid cohesion, ce...
- positive regulation of superoxide dis...
- positive regulation of removal of sup...
- positive regulation of ATPase−coupled...

contrast_2 | up

- argininosuccinate synthase activity
- argininosuccinate metabolic process
- L−arginine biosynthetic process
- cell body fiber
- response to mycotoxin
- cellular response to oleic acid
- toxic substance binding
- cell wall polysaccharide metabolic pr...

contrast_3 | down

- farnesyl diphosphate biosynthetic pro...
- dimethylallyltranstransferase activity
- (2E,6E)−farnesyl diphosphate synthase...
- positive regulation of cell growth in...
- positive regulation of cholesterol bi...
- germ cell migration
- positive regulation of cardiac muscle...
- asymmetric protein localization invol...

contrast_3 | up

- locomotory exploration behavior
- Toll binding
- excitatory synapse
- septate junction assembly
- septate junction
- cerebellum development
- Toll signaling pathway
- negative regulation of neuron project...

ovary_vs_abdomen_mated | down

- respiratory chain complex I
- purine ribonucleoside monophosphate m...
- phosphorylation
- mitochondrial electron transport, NAD...
- inner mitochondrial membrane protein ...
- extracellular space
- NADH dehydrogenase (ubiquinone) activity
- ATP metabolic process

ovary_vs_abdomen_mated | up

- positive regulation of gene expression
- nucleus
- nucleoplasm
- nuclear chromosome
- multi−organism reproductive process
- heterocyclic compound binding
- chromatin binding
- DNA binding

ovary_vs_abdomen_virgin | down

- respiratory chain complex I
- purine ribonucleoside monophosphate m...
- plasma membrane
- phosphorylation
- mitochondrial electron transport, NAD...
- inner mitochondrial membrane protein ...
- extracellular space
- ATP metabolic process

ovary_vs_abdomen_virgin | up

- positive regulation of gene expression
- nucleus
- nucleoplasm
- nucleolus
- nuclear chromosome
- multi−organism reproductive process
- heterocyclic compound binding
- chromatin binding
