D − GO summary (female−biased genes shared across all tiss
extracellular structure organization
vitelline membrane formation involved in...
prostaglandin metabolic process
fatty acid derivative metabolic process
cholesterol biosynthetic process
very−low−density lipoprotein particle as...
short−chain fatty acid catabolic process
regulation of chylomicron remnant cleara...
medium−chain fatty acid metabolic proces...
chylomicron assembly
cholesterol ester hydrolysis involved in...
acylglycerol catabolic process
