Total expressed genes
C − GO term enrichment across tissues
(high−expressed genes, ...log..... p)
regulation of peptide transport
positive regulation of chromatin organiz...
mRNA export from nucleus
protein export from nucleus
ribonucleoprotein complex localization
negative regulation of gene expression, ...
negative regulation of translation
columnar/cuboidal epithelial cell develo...
negative regulation of amide metabolic p...
oogenesis
DNA conformation change
mitotic cytokinesis
multi−organism reproductive process
protein deubiquitination
embryo development ending in birth or eg...
proteasome−mediated ubiquitin−dependent ...
intracellular protein transport
protein localization to membrane
peptide biosynthetic process
amide biosynthetic process
nuclear−transcribed mRNA catabolic proce...
protein localization to endoplasmic reti...
translational initiation
cytoplasmic translation
SRP−dependent cotranslational protein ta...
peptide transport
determination of adult lifespan
ATP metabolic process
neutrophil degranulation
purine ribonucleoside monophosphate meta...
phosphorylation
mitochondrial electron transport, NADH t...
mitochondrial respiratory chain complex ...
energy coupled proton transport, down el...
inorganic ion homeostasis
tricarboxylic acid cycle
transferrin transport
