Total expressed genes
C − GO term enrichment across tissues
(high−expressed genes, −log10 p)
columnar/cuboidal epithelial cell develo...
negative regulation of amide metabolic p...
oogenesis
proteasome−mediated ubiquitin−dependent ...
multi−organism reproductive process
protein deubiquitination
embryo development ending in birth or eg...
protein export from nucleus
ribonucleoprotein complex localization
mRNA export from nucleus
positive regulation of chromatin organiz...
viral process
mitotic cytokinesis
regulation of peptide transport
DNA conformation change
peptide transport
determination of adult lifespan
intracellular protein transport
protein localization to membrane
peptide biosynthetic process
amide biosynthetic process
nuclear−transcribed mRNA catabolic proce...
protein localization to endoplasmic reti...
translational initiation
cytoplasmic translation
SRP−dependent cotranslational protein ta...
neutrophil degranulation
ATP metabolic process
purine ribonucleoside monophosphate meta...
phosphorylation
mitochondrial electron transport, NADH t...
mitochondrial respiratory chain complex ...
monoatomic anion transmembrane transport
energy coupled proton transport, down el...
inorganic ion homeostasis
tricarboxylic acid cycle
transferrin transport
ribosomal small subunit assembly
citrate metabolic process
purine ribonucleoside monophosphate bios...
antibiotic metabolic process
